
RUNTAL CX

RUNTAL DESIGN STUDIO

runtal

RUNTAL CX. This elegant convector, created in the Runtal Design Studio, blends perfectly and unobtrusively into the room and is one of Runtal's classic products. The fins on this convector are arranged in a sophisticated design, laser welded precisely to the nearest millimetre and permit good air and heat circulation, quickly and efficiently heating the room. Since the convector has a straight front free from embellishments, is compact and offers a highly efficient heat output, it is an ideal solution for any location — not just in front of glass panels. RUNTAL CX is the perfect companion to the RUNTAL JET-X designer radiators. RUNTAL CX. Heating power and timeless elegance, perfectly combined.

RUNTAL CX RUNTAL DESIGN STUDIO

Runtal has been combining engineering expertise with architectural flair since 1953. The tradition of technical innovation and functional design is actively nurtured and developed by the Runtal Design Studio (RDS).

RDS holds in trust the creative heritage of the company's founders, Egon Runte and Jürg Altherr, defines the modern language of form of the Runtal brand, and is responsible for all design developments. It also collaborates with renowned international designers, commissioning feasibility studies and designs for new heating products. In addition, it examines technical and design proposals to evaluate their practicality, market potential and suitability for the brand.

By developing new materials and finishes, RDS creates innovative and practical solutions that enable sustainable use of energy and water. This is what gives innovative Runtal radiators their unique language of form.

This creative process produces simple, refined and efficient designs that employ the very best craftsmanship and materials. Swiss design, which first came to international prominence in the 1950s, is currently experiencing a renaissance, and is rightly considered a classic tradition.

PRODUCT DESCRIPTION

Featuring the characteristic gap between the flat oval tubes, this convector looks absolutely perfect when combined with the RUNTAL JET-X heating panel. This gap and the patented laser welding of the fins enable the heat output to be increased still further. The radiator can either be fitted on the floor or on the wall. RUNTAL CX is available in many different sizes and variants. On request it can also feature a stable grille. It can be connected to the central heating and is available with a powder coating in the full range of colours in the Runtal colour chart.

TECHNICAL DATA

Name	CX
Height	75-309 mm
Length	500-4000 mm
Connections	For central heating, various connections (see price list)
Valves	See Accessories price list
Colour	Powder-coated, available in all colours in the Runtal colour chart
Heat output	149-12164 W
Standard	

COLOURS (Actual colours may vary slightly from those shown)
