
RUNTAL FAIN INOX

RUNTAL DESIGN STUDIO

runtal

RUNTAL FAIN INOX. The delicate construction, consisting of tubes just 12 mm thick, and the brushed matt stainless steel surface make the RUNTAL FAIN INOX a robust yet elegant designer radiator. The radiator's non-corroding material, clever proportions and practical recesses for bath towels allow it to integrate perfectly into private and public bathrooms alike, whilst also lending them a refined air. Held in place by strong manifolds, the fine bars quickly and efficiently heat the room and towels. RUNTAL FAIN INOX. As practical as it is attractive.

RUNTAL FAIN INOX RUNTAL DESIGN STUDIO

Runtal has been combining engineering expertise with architectural flair since 1953. The tradition of technical innovation and functional design is actively nurtured and developed by the Runtal Design Studio (RDS).

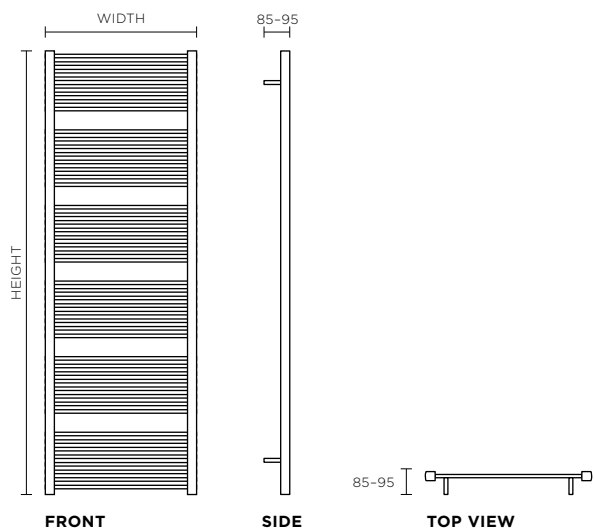

RDS holds in trust the creative heritage of the company's founders, Egon Runte and Jürg Altherr, defines the modern language of form of the Runtal brand, and is responsible for all design developments. It also collaborates with renowned international designers, commissioning feasibility studies and designs for new heating products. In addition, it examines technical and design proposals to evaluate their practicality, market potential and suitability for the brand.

By developing new materials and finishes, RDS creates innovative and practical solutions that enable sustainable use of energy and water. This is what gives innovative Runtal radiators their unique language of form.

This creative process produces simple, refined and efficient designs that employ the very best craftsmanship and materials. Swiss design, which first came to international prominence in the 1950s, is currently experiencing a renaissance, and is rightly considered a classic tradition.

TECHNICAL SPECIFICATIONS

PRODUCT DESCRIPTION

The well thought-out design means that the 30x30 mm manifolds form the vertical and slightly rounded outer edge of the designer radiator. Heating tubes, just 12 mm thick, feed into them. Produced solely from brushed matt V4A stainless steel, the RUNTAL FAIN INOX and its fantastic durability offer improved protection from internal and external corrosion. RUNTAL FAIN INOX can either be connected to the central heating or operated in electric only mode (on request).

TECHNICAL DATA

Name	FAI
Height	842/1192/1467/1714 mm
Width	350/500/600 mm
Connections	For central heating, 2x½" at bottom, for flow, return, air vent ¼" at top
Valves	See Accessories price list
Colour	V4A stainless steel
Heat output	256/355/409/471/661 W 300/600 W (electric only)
Standard	CE
