
RUNTAL HT ONDA S

RUNTAL DESIGN STUDIO

runtal

RUNTAL HT ONDA S. A designer radiator with a highly appealing delicate lightness. Supported by the two main tubes, the linear pattern seems to hover in front of the wall and, with its intricate interplay of light and shade, lends the RUNTAL HT ONDA S a very special appeal. The artistically curved, wavelike form spreads a sense of well-being throughout the room and allows the radiator to be used in many different ways: as a delicate designer piece in the living room or as an unusual room divider, installed either vertically or horizontally. We call it RUNTAL HT ONDA S. Light, shade, warmth — with an airy, curved feel.

RUNTAL HT ONDA S RUNTAL DESIGN STUDIO

Runtal has been combining engineering expertise with architectural flair since 1953. The tradition of technical innovation and functional design is actively nurtured and developed by the Runtal Design Studio (RDS).

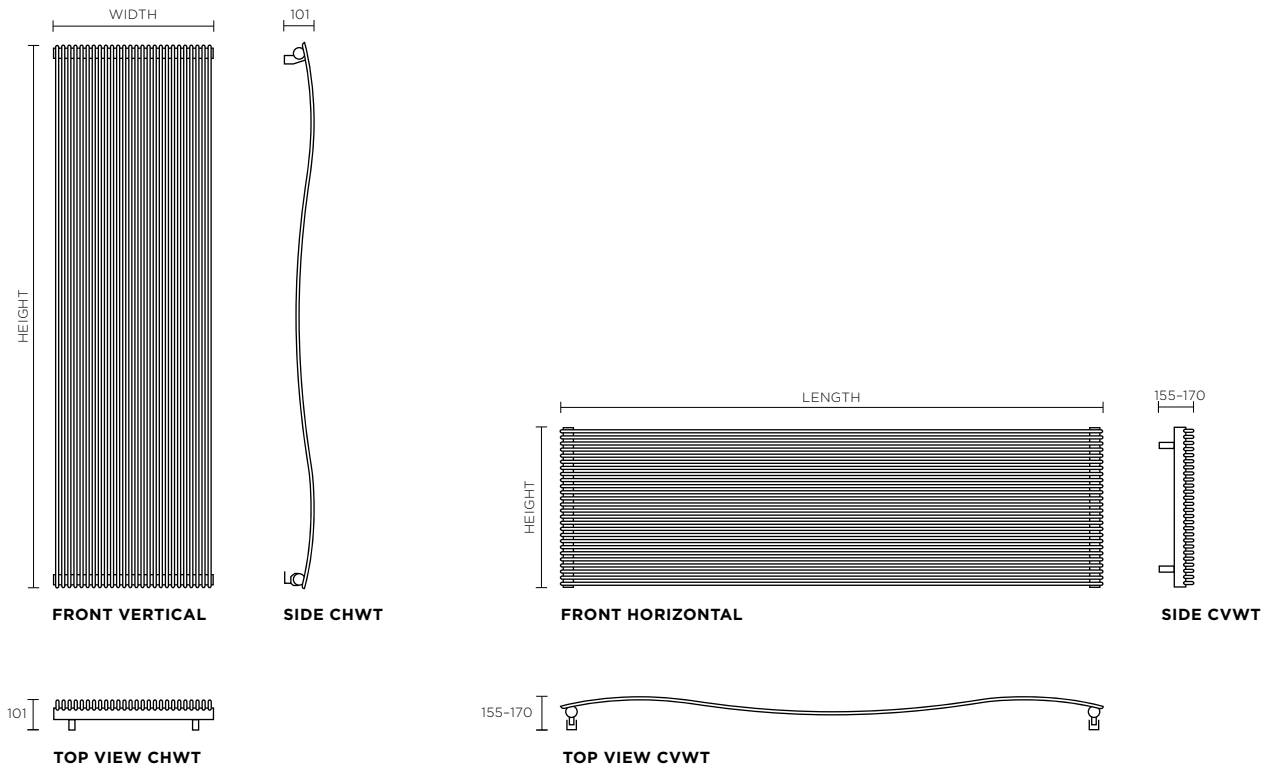

RDS holds in trust the creative heritage of the company's founders, Egon Runte and Jürg Altherr, defines the modern language of form of the Runtal brand, and is responsible for all design developments. It also collaborates with renowned international designers, commissioning feasibility studies and designs for new heating products. In addition, it examines technical and design proposals to evaluate their practicality, market potential and suitability for the brand.

By developing new materials and finishes, RDS creates innovative and practical solutions that enable sustainable use of energy and water. This is what gives innovative Runtal radiators their unique language of form.

This creative process produces simple, refined and efficient designs that employ the very best craftsmanship and materials. Swiss design, which first came to international prominence in the 1950s, is currently experiencing a renaissance, and is rightly considered a classic tradition.

TECHNICAL SPECIFICATIONS

PRODUCT DESCRIPTION

RUNTAL HT ONDA S is an elegant, subtly curved variation on the delicate design of RUNTAL HT/VT. It's the ideal solution for buildings that require a fast-acting heating system. RUNTAL HT ONDA S is designed for connecting to the central heating and is available in numerous designs: vertical or horizontal, single or double and in lengths of up to 2193 mm. The surface can be made from powder-coated steel in the full range of colours in the Runtal colour chart or feature a technoline (clear paint) coating. Numerous special versions are also available.

TECHNICAL DATA

Name	CVWT (horizontal) CHWT (vertical)
Height	CVWT 190-950 mm CHWT 1793/1993/2193 mm
Width/length	CVWT 1793/1993/2193 mm CHWT 190-950 mm
Connections	For central heating, various connections (see price list)
Valves	See Accessories price list
Colour	Powder-coated, available in the full range of colours in the Runtal colour chart or with a technoline (clear paint) surface
Heat output Standard	461-3329 W
