
RUNTAL RX

RUNTAL DESIGN STUDIO

runtal

RUNTAL RX. Lightness in radiator design. Slim, flat oval tubes give this designer radiator an airy, transparent, latticed look, a modern take on the company founders' original 1964 design. Ideal for all rooms requiring a fast-acting heating system, the radiator is available with 12 different spacings between the elements, giving you the freedom to design your own individual heating solution. This radiator can be finished in almost any colour and has all the characteristics of a best-seller. RUNTAL RX. A milestone from the Runtal Design Studio.

RUNTAL RX RUNTAL DESIGN STUDIO

RUNTAL RX RUNTAL DESIGN STUDIO

Runtal has been combining engineering expertise with architectural flair since 1953. The tradition of technical innovation and functional design is actively nurtured and developed by the Runtal Design Studio (RDS).

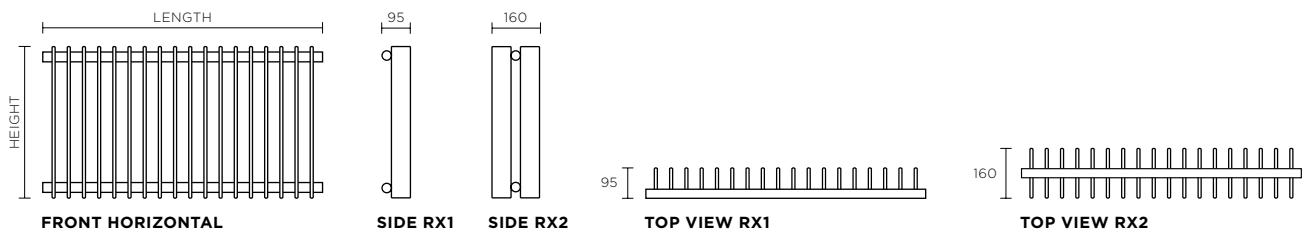

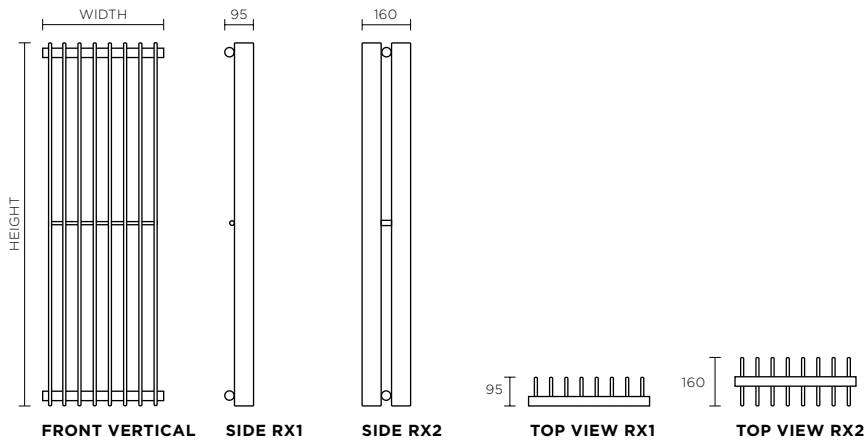

RDS holds in trust the creative heritage of the company's founders, Egon Runte and Jürg Altherr, defines the modern language of form of the Runtal brand, and is responsible for all design developments. It also collaborates with renowned international designers, commissioning feasibility studies and designs for new heating products. In addition, it examines technical and design proposals to evaluate their practicality, market potential and suitability for the brand.

By developing new materials and finishes, RDS creates innovative and practical solutions that enable sustainable use of energy and water. This is what gives innovative Runtal radiators their unique language of form.

This creative process produces simple, refined and efficient designs that employ the very best craftsmanship and materials. Swiss design, which first came to international prominence in the 1950s, is currently experiencing a renaissance, and is rightly considered a classic tradition.

TECHNICAL SPECIFICATIONS

PRODUCT DESCRIPTION

The best-selling RUNTAL RX is both graceful and highly versatile. It's the ideal solution for buildings that require a fast-acting heating system or have very strict hygiene requirements. The slim, flat oval tubes, just 8 mm wide, are separated by large transparent spaces. This allows more light through, especially when the radiator is installed in front of glass. The radiator is available with 12 different spacings between the elements, so it can be adapted to suit the room and discreetly integrated into its surroundings. With its low water capacity, RUNTAL RX heats up very quickly and because of its slender design it is ideal for dual use as a heater and room divider. It can be customised in many different ways.

TECHNICAL DATA

Name	RX1/RX2
Height	See price list
Width/length	See price list
Gap between elements	30/35/40/45/50/55/ 60/65/70/80/90/100 mm
Connections	For central heating, various connections (see price list)
Valves	See accessories price list
Colour	Powder-coated, available in all colours in the Runtal colour chart
Heat output Standard	See price list
