
RUNTAL VELUM

KING & MIRANDA

runtal

RUNTAL VELUM. Elegantly undulating design. This unique designer radiator takes a mesmerising form. And behind the perfectly formed exterior lies a pioneering and efficient heating concept: an effective modular system with a steel core surrounded by ultra-lightweight aluminium elements that heat up very quickly. The flexible construction and wide-ranging colour options allow this radiator to blend into any interior design concept. A multi-award-winning development by designers Perry King and Santiago Miranda. We call it RUNTAL VELUM: the heatwave.

RUNTAL VELUM KING & MIRANDA

Englishman Perry A. King and Spaniard Santiago Miranda rank among the most prominent names on the international design scene. Since founding their own studio, "King-Miranda Associati", in Milan in 1976, they have worked for an international clientele as architects, interior designers and product designers. Their distinctive style combines functional and technological innovation with cultural and emotional connotations. King-Miranda are the authors of numerous publications, jurors in international design competitions, and active participants in research and teaching. King was awarded the distinction of Royal Designer for Industry (RDI) in 2000 by The Royal Society of Arts, London and Miranda received the Premio Nacional de Diseño Español in 1989 and Premio Andalucía de Diseño in 1995.

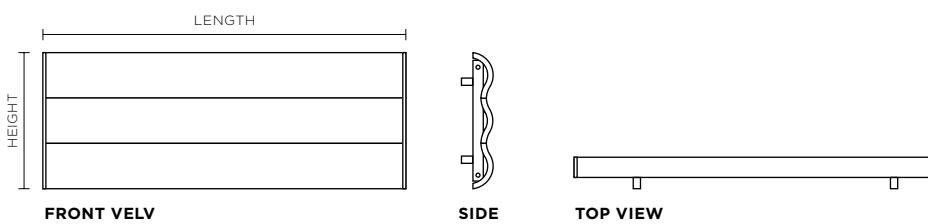

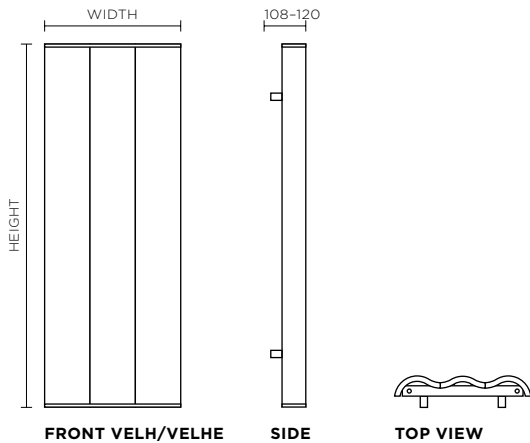

In addition to the designer radiator RUNTAL VELUM, the duo have designed and realised a number of other products for the Gränichen-based Zehnder Group, such as the Zehnder Planus and the Zehnder Metropolitan. RUNTAL VELUM has won several international design awards, including Design Plus at ISH 2005 and the Janus de l'Industrie in 2006.

DESIGN PLUS

TECHNICAL SPECIFICATIONS

PRODUCT DESCRIPTION

The innovative construction of the designer radiator RUNTAL VELUM sets standards in functionality and energy efficiency. Inside is the heating element, a round tube containing a small volume of water, surrounded by highly conductive aluminium. The advantage of this material combination is that it is lightweight, heats up faster, and uses much less energy. The surface is also specially textured to ensure optimum heat distribution. The modular concept, available in vertical and horizontal models, can be customised to suit the room - whether a living room, workspace, kitchen or bathroom. RUNTAL VELUM is suitable for electrical operation or connection to a central heating system.

TECHNICAL DATA

Name	VELH (vertical elements) VELV (horizontal elements) VELHE (electric only)
Height	See price list
Width/Length	See price list
Connections	For central heating, various connections according to price list
Valves	See Accessories price list
Accessories	Chrome-plated towel rail, width 300/450/600 mm
Colour	Powder-coated, available in all colours in the Runtal colour chart except inox look and titanium
Heat output	See price list
Standard	CE
